Orthotic Special

Dear Randy,

Our feet were designed to walk on natural, soft surfaces like soil and sand. Unfortunately, we give our feet a daily pounding by walking and standing on unnatural hard, flat surfaces like pavements and floors. This forces our feet to "roll inwards" and our arches to flatten- a conditions called "excess pronation".

Poor foot stability can cause:

- Flat Feet
- Ball of Foot Pain
- Bunions & Hammer Toes
- Corns & Callous
- Shin Pain
- Heel Pain
- Knee & Hip Pain
- Growing Pain in Children
- Spinal instability

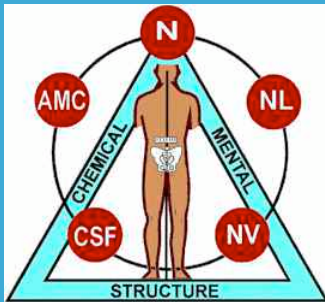

We abuse our feet and it is so simple to care for the feet before they get too bad. That's why I'm offering this Orthotic Special to you.

I've been wearing the same orthotic I'm offering you for over 10 years. They are very comfortable and are not too hard yet are durable.

Already have a pair of orthotics? Now is the time to get that second pair. Normally these orthotics cost \$75 but through the end of March you can have these custom orthotics for only \$50. One pair per person at this price. Schedule a time now and have happier feet!

Regular Price: \$75
March Price: \$50

Dear Patients,

Please follow the following link <http://www.zoomerang.com/survey.zgi?p=WEB2267TVLF84G> and fill out a brief anonymous survey to help our AK (Applied Kinesiology) organization better serve you. This will take about 10 minutes of your time.

Thank You,

Randy Schaetzke, DC, DIBAK

Tip: I put orthotics in boots that have little or no support. Mud season is coming!

Sincerely,
